

Hero: Remove Contact button, change subtitle, keep “Start Your Project” → WhatsApp, and make fully mobile responsive.

I want this type of the menu bar touch panna eppadi varanum

Please update the **Testimonial section** by adding **Left (←)** and **Right (→)** navigation buttons.

The buttons should allow users to move between testimonials smoothly. Place them outside the testimonial cards and keep them vertically centered. The active testimonial can have the existing **orange highlight**.

Keep the current testimonial card design, colors, typography, and spacing unchanged. Make the arrows responsive and swipe-friendly on mobile.

In services Page

Please redesign the “**Why This Matters**” section with a more unique, premium layout instead of the current simple two-column structure.

- Keep the existing **dark background, typography style, and Zen Nova branding**.
- Create an **asymmetrical editorial layout** with stronger visual hierarchy.
- Make the main heading large and dominant on one side.
- Break the supporting content into **3 small benefit blocks/cards** instead of two long paragraphs.
- Add subtle numbers or visual markers like **01 / 02 / 03** for each benefit.
- Use a staggered/offset arrangement so the section feels more dynamic and custom-designed.
- Add a small supporting graphic or abstract development-related visual element without overcrowding.
- Maintain generous whitespace and consistent container margins.
- Make the layout fully responsive: on mobile, stack the content vertically while keeping the visual hierarchy.
- Keep the section **minimal, premium, modern, and conversion-focused**.

Important: Do not change the existing brand colors or completely redesign the website. Only improve this section with a unique layout.

WHY THIS MATTERS

We don't offer everything — just what we know how to do well.

We don't offer every service under the sun — just the ones we know how to do well. That focus means every project gets the attention it deserves, and you get work that actually moves your business forward.

Whether you need a single service or a complete digital presence, we're here to help you make smart decisions — not just sell you more stuff.

page

Remove one whatsapp button in the service page

For the About page stats section, please update the typography for both numbers and labels.

- **Numbers:** Use **Space Grotesk ExtraBold (800)** — large, bold, modern, and distinctive.
- **Labels:** Use **DM Sans Medium (500)** — clean and highly readable.
- Keep the existing orange brand color for the numbers.
- Increase the visual contrast between numbers and labels.
- Keep all 4 statistics perfectly aligned with equal spacing.
- Add slightly tighter letter spacing to the numbers and subtle letter spacing to the labels.
- Make the typography responsive on tablet/mobile.

The goal is to make **“Sep ’25 / 20+ / 2 / TN”** feel like a strong premium brand statistic rather than a standard text row.

Do not change the existing colors or overall section layout—only improve the typography and visual hierarchy.

Please redesign the “**Why This Matters to You**” section with a genuinely unique UI layout. The current centered heading + paragraph layout feels too generic.

New UI Direction

- Keep the existing **dark teal background and orange accent**.
- Use an **asymmetric editorial layout** instead of centered content.
- Place the main heading on the **left side**, large and bold.
- On the right side, create **3 vertically stacked benefit blocks** with:
01 — More Attention
02 — Faster Decisions
03 — Direct Access
- Each block should have a short 1–2 line explanation.
- Add a thin vertical/animated line connecting the three numbered blocks.
- Use oversized, subtle background numbers **01 / 02 / 03** as decorative elements.
- Add a small orange accent line or micro-label for each benefit.
- Keep generous whitespace and strong typography hierarchy.

- Avoid excessive cards, shadows, gradients, or unnecessary animations.
- Add a small “**Why it matters →**” visual indicator at the bottom.

Responsive

On mobile:

- Stack the heading first.
- Then show the 3 benefits vertically.
- Keep the numbered visual system.
- Reduce font sizes and spacing without losing the premium look.
- No horizontal overflow.

Goal: Make this section feel like a **premium digital studio manifesto**, not a normal “heading + paragraph” section.

Keep the existing Zen Nova branding and colors; change only the UI layout and hierarchy.

Zen Nova Solutions — Website Update Summary

Overall Direction: “Refine, don’t redesign.”

The existing Zen Nova branding, colors, typography style, spacing, and premium agency feel should remain consistent. The focus is on refining the UI, improving responsiveness, and making selected sections more premium and conversion-focused.

1. Hero Section

- Remove the Contact button.
- Update the subtitle.
- Keep “Start Your Project” and connect it to WhatsApp.
- Make the hero fully mobile responsive.

2. Navigation / Menu

- Improve the mobile menu interaction so it feels clean, intuitive, and touch-friendly.

3. Testimonials

- Add left/right navigation arrows.
- Keep the existing testimonial card design, colors, typography, and spacing unchanged.
- Make navigation responsive and swipe-friendly on mobile.

4. Services — “Why This Matters”

- Replace the generic two-column layout with an asymmetric editorial layout.
- Use three benefit blocks: 01 / 02 / 03.
- Add stronger hierarchy, generous whitespace, and a subtle development-related visual.
- Keep the existing dark background and Zen Nova branding.

5. WhatsApp Buttons

- Remove the unnecessary/duplicate WhatsApp button from the Services page.
- Remove the WhatsApp button from the Portfolio page.

6. About Page Stats

- Numbers: Space Grotesk ExtraBold (800).
- Labels: DM Sans Medium (500).
- Keep orange numbers and improve typography/visual hierarchy.
- Maintain equal alignment and responsive behavior.

7. “Why This Matters to You”

- Create a more unique premium UI.
- Left: large heading.
- Right: 01 — More Attention; 02 — Faster Decisions; 03 — Direct Access.
- Add a connecting line, subtle background numbers, and orange accents.
- On mobile, stack the content vertically with no horizontal overflow.

8. Pricing

- Update the current pricing section.
- Remove the Pros & Cons content from the pricing section.

Final Goal

Make Zen Nova Solutions look more premium, intentional, modern, and conversion-focused while preserving the existing brand identity. The priority is better UI hierarchy, responsive mobile experience, and removal of unnecessary elements.
